

APA Style Modifications for the Take Home Questions.

The answers to the take home questions should be typed, double spaced, and have margins that are 1" all around. While page numbers are required, headers do not have to be used. It should be obvious, but an Abstract for the questions is not necessary. What you should include, however, is the number and the written question that you are answering. Each answer to a question should begin at the top of a new page.

Sources should be cited. List all authors for each citation the first time you use it in any given answer. Do not use the et al. abbreviation the first time you cite a source in a given answer. Therefore, if you use the same source for two different answers, you will need to write the reference out fully the first time you use it in the second answer.

Each answer should have a list of references following it. To indicate the Reference section, center the word Reference on the line following the completion of the answer. You may leave space after your answer and then include the references or you may start the Reference section on the page following the answer. Remember, each answer should have its own Reference section.
