6. I always consider my classes to be a work in progress. Toward that end, I would like your input on the class. What was useful? What wasn't useful? What should be kept the next time I teach it; what should be dropped? Is there anything I didn't cover that you would like to see covered or would like to know more about? How about teaching style? What worked and what did not work? Any other comments about the class are appreciated. (4 pts) **In order to keep these answers anonymous, please print this answer separately from your others.
