Errata. (2003). *Review of General Psychology*, 7, 37.

I note two errors in Haggbloom et al's list of eminent psychologists. One is the appearance of the name

of W. Gary Cannon, a recently-deceased psychologist, who was neither a member of the National Academy of Sciences (NAS) nor associated with the Cannon-Bard theory of emotion. These were instead the accomplishments of the great American physiologist, Walter B. Cannon, who made important contributions to psychology. A second error involving the name of Cannon concerns the entry for an individual identified as Margarete [sic] Washburn whose accomplishments were those of Margaret F. Washburn. Haggbloom et al credit her with an eponym for the Cannon-Washburn experiment on the nature of hunger sensations (Cannon, W.B., & Washburn, A.L., 1912, An explanation of hunger. *American Journal of Physiology*, 29, 441-454.). The Washburn of this famous experiment was A.L. Washburn, and the eponym memorializes his heroic contribution to this experiment, not Margaret F. Washburn's. Consequently, a reassessment and possible revision of the list of Haggbloom et al (2002) is called for. From: Stephen L. Black, Department of Psychology, Bishop's University, Lennoxville, QC J1M-1Z7, Canada..

The authors thank Stephen L. Black, Bishop's University, for identifying our errors and especially for drawing our attention to the mis-attributed Cannon-Washburn eponym. In Table 4 on page 147, the name W. Gary Cannon should in fact be W. B. Cannon. Also, the eponym "Cannon-Washburn experiment" was incorrectly attributed to Margaret Washburn rather than A. L. Washburn. Correcting this error (a) removes Margaret Washburn from the list, (b) moves each name below Washburn up one place, and (c) moves Leo Postman from #100 (previously unidentified) to #99. Postman has a ranking of 52 on the Journal Citation List and was elected to the National Academy of Sciences. From: Steven J. Haggbloom, Department of Psychology, Western Kentucky University, 1 Big Red Way, Bowling Green, KY 42101.
